The University expects future Legislative appropriations to meet the debt service for Tuition Revenue Bonds.

NOTE 7: DERIVATIVE INSTRUMENTS

Derivative Investing

Derivatives are financial instruments (securities or contracts) whose value is linked to, or "derived" from, changes in interest rates, currency rates, and stock and commodity prices. Derivatives cover a broad range of financial instruments, such as forwards, futures, options, swaps, and mortgage derivatives. These mortgage derivatives are influenced by changes in interest rates, the current economic climate, and the geographic make-up of underlying mortgage loans. There are varying degrees of risk associated with mortgage derivatives. For example, Planned Amortization Class (PACs) and Collateralized Mortgage Obligations (CMOs) are considered a more conservative lower risk investment. In contrast, principal only and interest only strips are considered higher risk investments.

The University holds various forms of collateralized mortgage obligations such as fixed coupon, inverse floating rate and principal only. The University invested in these securities in part to maximize yields and in part to hedge against falling interest rates. These securities are reported at fair value in the balance sheet.

A Member of the Texas State University System

NOTES TO THE FINANCIAL STATEMENTS August 31, 2014

They are reported in aggregate as U.S. Government and Agency Securities in the disclosure of credit risk in this note.

These securities are based on cash flows from interest payments on underlying mortgages. Therefore, they are sensitive to pre-payments by mortgagees, which may result from a decline in interest rates. However, these investments do not pose a significant risk. The University's investments in derivatives comprise less than $1\frac{8}{2}$ as of August 31, 2014 and August 31, 2013 with a fair value of \$2,544.58 and 2,544.58, respectively.

The majority of these investments were purchased prior to fiscal year 1995. In 1995, the Texas Legislature took steps to limit state entities' and local governments' ability to invest in high risk derivatives by amending the Public Funds Investment Act. These statutory limitations do not apply to certain institutions of higher education having total endowments of at least \$95 million. The University is in compliance with the Public Funds Investment Act.
